1) XML file is use for...?

   a) Connect to table

   b) Connect to DataBase

   c) a and b

   d) None

2) Configuration is a.......Hibernate in java?

   a) Object

   b) Class

   c) Method

   d) None

3) Hibernate xml file name is a...?

   a) hybernate.cfg.xml

   b) Hibernate.cfg.xml

   c) hibernate.cfg.xml

   d) All of the Above

4) What is Hibernate in java...?

   a) Framework

   b) Class

   c) Method

   d) None

5) Hibernate architecture is a factory of session and client of Connection Provider?

   a) SessionFactory

   b) Session

   c) Transaction

   d) Connection Provider

6) Why we use @Entity Annotation in Hibernate...?

   a) Create a DataBase

   b) Create a Table

   c) a and b

   d) None

7) Why we use @ID Annotation in Hibernate...?

   a) Create table

   b) Data store

   c) a and b

   d) None

8) Abbreviate the term HQL?

   a) Hipher Query Language

   b) Hibernate Queue Language

   c) Hibernate Query Language

   d) None of the above

9) Which method is easy for a java programmer to add a criteria?
   a) HQL
   b) HCQL
   c) SQL
   d) None of the above

10) Hibernate is an?
    a) Lightweight
    b) ORM
    c) Open Source
    d) All mentioned above

11) Which of these simplifies an Object Relational Mapping tool?
    a) Data access
    b) Data creation
    c) Data manipulation
    d) All mentioned above

12) Hibernate framework simplifies the development of java application to interact with the database.?
    a) True
    b) False

13) Hibernate ORM stands for ?
    a) Object Relational Mapping
    b) Class Object Mapping
    c) Class Relational Mapping
    d) None

14) A _____ is an object that maintains the connection between Java object application and database.
    a) Session
    b) Cookie
    c) Cache
    d) persist

15) SessionFactory provides an instance of Session.
    a) True
    b) False

16) Hibernate JDBC stands for ?
    a) Java DataBase connection
    b) Java DataBase Connectivity
    c) a and b
    d) None

17) Save() method is used for...?
    a) Update records
    b) Insert records
    c) Delete records
    d) None

18) The Hibernate architecture consists of?
   a) session factory
   b) persistent object
   c) transaction
   d) All of the above

19) Is a Framework in java...?
   a) Hybernate
   b) Hibernate
   c) a and b
   d) None

20) Load() method is used for...?
   a) Insert record
   b) Delete record
   c) a and b
   d) None

21) It is inbuild method in Hibernate...?
   a) Save()
   b) Get()
   c) a and b
   d) None

22) Which of the following is not a core component of Hibernate?
   a) Provider
   b) Transaction
   c) Criteria
   d) Query

23) Session.beginTransaction method begins a unit of work and returns the associated Transaction object.
   a) True
   b) False

24) Delete() method is used for...?
   a) Delete records

   b) Save records

   c) a and b

   d) None

25) What is the difference between get() and load() methods of session object?
   a) get() always hits the database whereas load() method doesn't hit the database.
   b) get() returns null if no data is present where as load throws ObjectNotFoundException exception in such case.
   c) get() returns actual object whereas load() returns proxy object.
   d) All of the above.

26) It is Not inbuild method in Hibernate...?

  a) Save()
  b) Load()
  c) Get()
  d) None

27) The POJOs stands for...?

  a) Plane Old Java Objects
  b) Particular Old Java Objects
  c) Plain Open Java Objects
  d) Plain Old Java Objects

28) Update() method is used for...?

  a) Delete records
  b) Load records
  c) a and b
  d) None

29) Is a Technology in java...?

  a) Hibernate
  b) SpringBoot
  c) a and b
  d) None

30) Why we use Criteria in hibernate...?

  a) Data store
  b) Save data
  c) a and b
  d) None
